

Fundamentals of the Personal Data Protection Act (PDPA) 2020

Under the Personal Data Protection Act 2012 (PDPA), organisations are required to appoint one or more Data Protection Officers (DPOs) to be responsible for ensuring the organisation's compliance with the PDPA.

To equip DPOs with basic knowledge and skills in complying with the PDPA, a three-day course – “Fundamentals of the Personal Data Protection Act (2020)” – has been developed under the Workforce Skills Qualifications (WSQ) skills framework for ICT.

The course, which has been enhanced with an expanded curriculum and more rigorous assessments, will cover the following areas:

- Introduction to the PDPA
- Role of DPO
- Develop a process for dispute resolution
- Managing data breaches
- Data Protection and Do Not Call Provisions
- Create an organisation's data inventory map (DIM) and identify possible areas of non-compliance
- Training and communications to staff for compliance to data protection provisions
- How to use the complimentary PDPA Online Assessment Tool for Organisations (PATO) to help improve data protection policies and practices

BENEFITS

1

Learn about the key concepts and obligations of the PDPA and understand what needs to be done to facilitate compliance.

2

Obtain a WSQ Statement of Attainment (SOA) issued by SkillsFuture Singapore (SSG) upon successful completion of course and assessments.

3

SSG Funding*

For more information for employer-based training please visit:
