General comments: We understand that under certain circumstances, PDPC proposes that organisations make an assessment as to whether there are any risks or impact to the individuals from the collection, use or disclosure of personal data. This will require the conduct of a risk and impact assessment.

We seek clarification as to whether the PDPC will be providing a prescribed format of the risk and impact assessment. If not, we will appreciate it if PDPC could provide more guidance regarding the contents to be included in the assessment as well as the frequency which the assessment should be conducted.
